## MICROCHIP YOUR PET

Microchipping is a quick and harmless procedure where a small microchip is inserted between your pet's shoulder blades either by a local vet or animal welfare organisation. It provides identification only for your animal.

If your microchipped pet goes astray and is taken to a vet, pound or shelter, we use the microchip's data to contact you and quickly reunite you with your pet.

Microchipping your animal does not include registration. You must register your dog by 6 months and cats by 4 months of age.

Our furry friends are so important in our lives, so make sure your pet is microchipped so if it does go astray we can return it safely to you. Find out more from Council's website.

## SWOOPING BIRDS

Spring often signals the beginning of breeding season for our native birds, mainly Magpies and Plovers, which subsequently means swooping.

During the nesting season, a Magpie may swoop on people, clacking its beak. While alarming, it is usually an attempt to defend its family so just a warning.

The good news is that a single Magpie will swoop for only six weeks until their chicks leave the nest.

Council has prepared a list of known swooping locations along with some safety tips to help protect you and your family. This information is available on Council's website.

If you know of a hot spot swooping location, please let us know by completing the online form from Council's website.
